Contents The Contexts Render Context Here we find the settings that control overall rendering of the final images, i.e. Like many hackers, Roboro had an old Should you buy a Nutribullet or are there better, or cheaper alternatives? Our independent blender reviews compare popular brands and reveal the best blenders.. In versions of Blender prior to 2.67, these settings were combined into the Render Context.

These make changes to the geometry that only take effect at rendering time Note: lamps, cameras and empty objects cannot have modifiers.. It is the area where you will see the greatest number of changes from earlier versions of Blender (in which, it was called the Buttons window).

This is also the case for the following object-specific contexts Object Constraints Context These settings limit the motion of the object for animation purposes.. You can also select another scene to be a “background” for this scene That is, all renders of this (foreground) scene will also include the contents of the background scene, as though they had been copied into this scene.
